

SLIDEEEE

What is Slideeee?

- Clubs on campus are currently using a mix of Discord, and Instagram to communicate with their members and the general body.
- The problem with this current method is Discord and Instagram are flooded with information making it hard and confusing to get information about upcoming events and promotions.
- Slideeee is a mix of a social media platform, an event finder, and a calendar tailored to the RPI community. The app includes two main flows, one for finding events and one for creating events. Slideeee aims to provide a platform for both those looking to stay up to date with events from their favorite clubs and people looking for new events to attend. At its core, Slide aims to grow the communities at RPI.

Semester Goals

- FRONTEND
 - Begin Work on the Home/ Main Page
 - Styling Updates
 - Frontend Improvements
 - Create Event Format
 - Create Groups page
 - Create Individual Group page
 - Display invites
- BACKEND
 - Solving circular dependency issue
 - Completion of Group Design
 - Completion of Invite Design
 - Adding functionality to accept/decline and view invites
 - Completion of Event Design
 - Adding Functionality for posting an event
 - Adding functionality for interacting with an event
- TESTING
 - Create test suites for all modules
 - Improve coverage to ~ 45%
- Completed Demo/MVP

Tech Stack

Our Team

Dyami Watson Jr – Project Lead

Reuben Abu – Co - Project Lead

Michael Annor – Fullstack Developer

Sutherland Brown – Fullstack Developer

Jeda Coward – Fullstack Developer

Key Features

- Groups
 - CRUD
 - Roles
 - Owner
 - Administration
 - Followers
 - Public and Private
- Events
 - CRUD
 - Event Interactions
 - Slide
 - Like
 - Comment
 - Event Collaboration

Future Goals/Plans

- Improve user experience/ "For you" page
- Events Hotspot map
- Event picture gallery
- Suggested accounts to follow
- Notifications System
- Live Event support
- Product Launch
